# Munich Airport VIP Wing

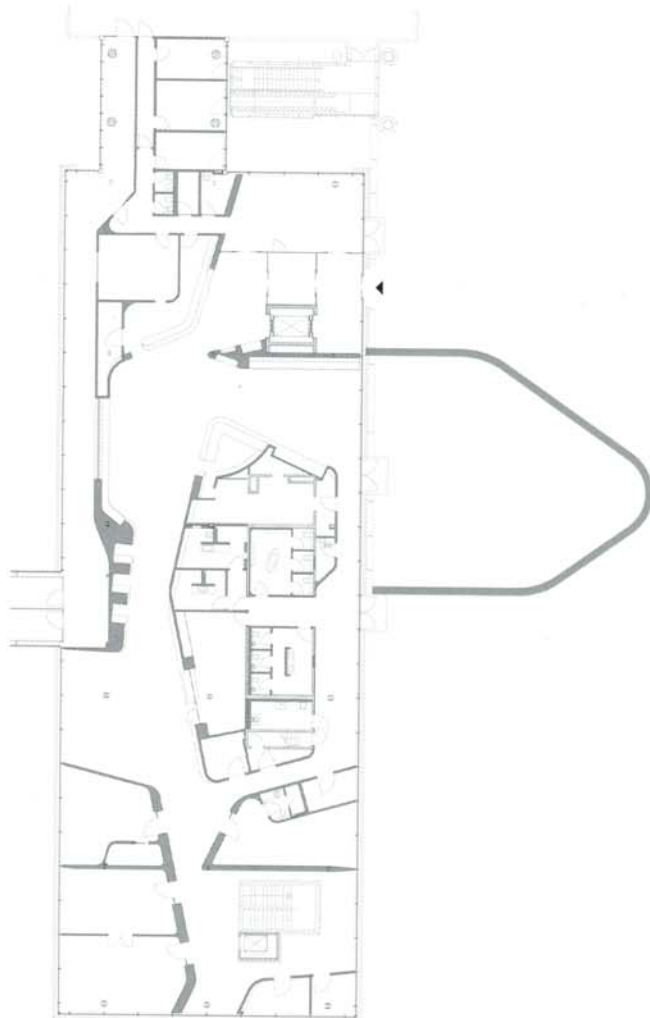

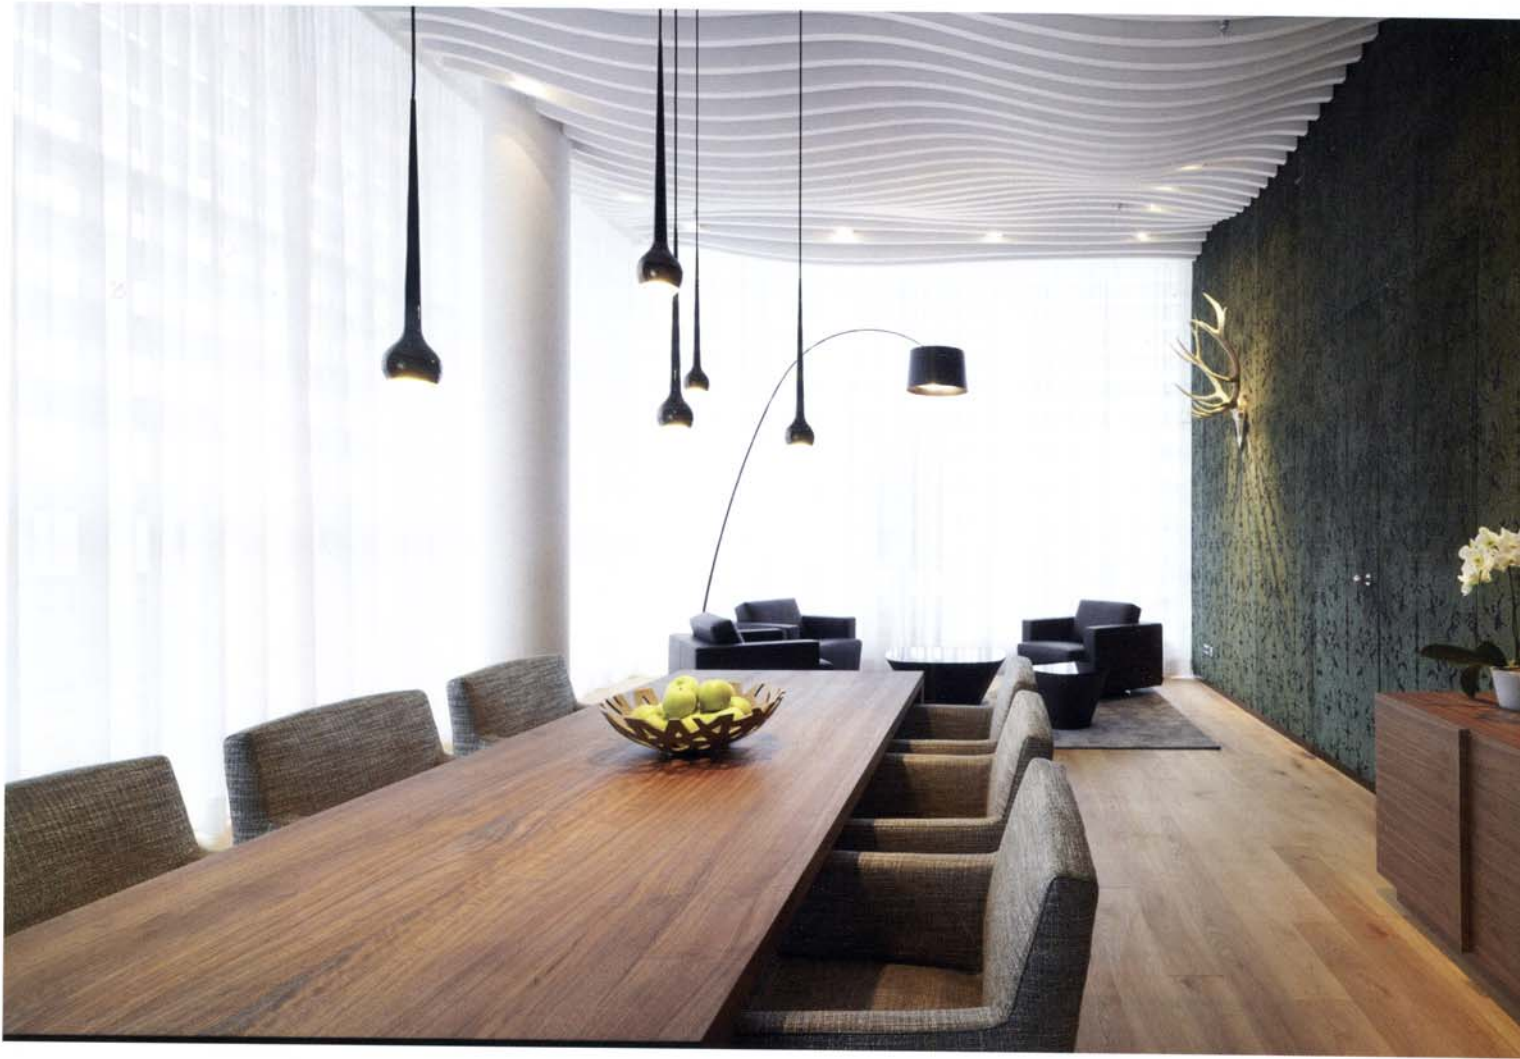

Munich

The VIP lounge at Munich Airport is a modern implementation of a special identity, skillfully uniting progress and tradition. The Schloss Neuschwanstein Conference Suite provides meeting facilities for up to ten people. Under the slogan "Laptop und Lederhose" (Laptop and leather pants), alpine motifs such as the solid split-wood wall cladding are combined with the latest conference technology. A video projector, electrically activated screen and dimmable lighting are integrated in the ceiling. The business corners offer a suitable atmosphere for quiet, subdued work and communication. Alcoves cut into the wall, with felt-cushioned niches and solid-oak tables, are equipped with all the necessary connections for the latest means of communication. The lounge can be accessed both from the airport apron and from the landside through a separate security area.
